

NASA's Authorized Guide to Materials

MAPTIS IS A SINGLE SOURCE POINT for acquiring, assessing, archiving, and disseminating materials information to ensure successful performance, increase safety, and to save resources throughout a product life cycle.

MAPTIS PROVIDES MATERIALS INFORMATION for material design data, reference data, and other material data for NASA and NASA support contractors and partners.

MAPTIS IS USED GLOBALLY

Some MAPTIS Users Include:

- NASA
- COMMERCIAL SPACE PROVIDERS
- COMMERCIAL ORGANIZATIONS
- GLOBAL PARTNERS
- NASA CONTRACTORS
- ACADEMIA
- INTERNATIONAL SPACE PARTNERS

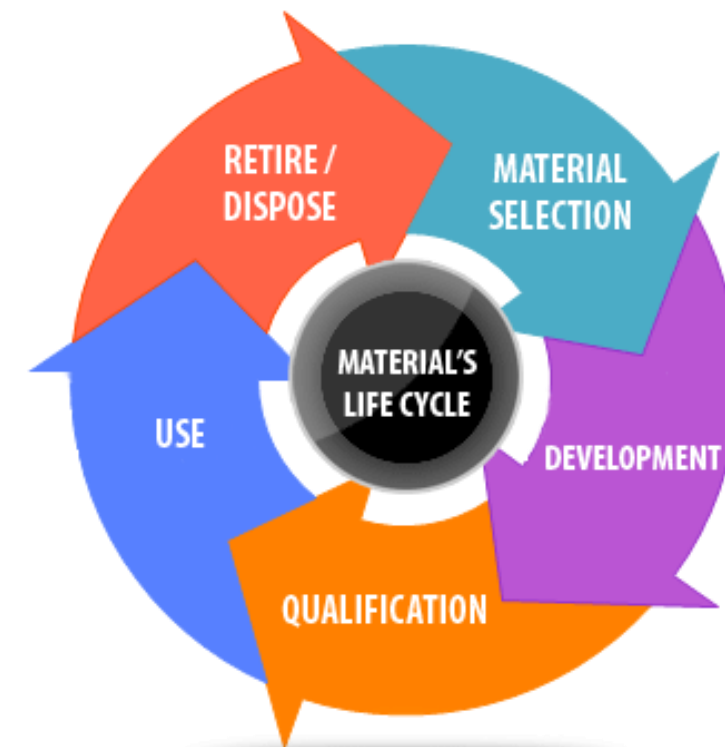

MAPTIS

Materials & Processes Technical Information System

MAPTIS IS A ONE-STOP-SHOP for exploring multiple databases about metals, composites, ceramics, or polymers.

MAPTIS has aerospace materials information available to support:

- Physical and structural properties
- Chemical compatibility
- Thermal protection system
- Space environmental effects
- Thermophysical and thermal data
- And more...

MAPTIS IS NASA'S AUTHORIZED GUIDE TO MATERIALS THAT ARE SAFE TO USE IN SPECIFIC OPERATING ENVIRONMENTS.
